FMake fewer HTTP requests

FUse a Content Delivery Network (CDN)

AAvoid empty src or href

FAdd Expires headers

ACompress components with gzip

APut CSS at top

APut JavaScript at bottom

FAvoid CSS expressions

n/aMake JavaScript and CSS external

AReduce DNS lookups

AMinify JavaScript and CSS

AAvoid URL redirects

ARemove duplicate JavaScript and CSS

AConfigure entity tags (ETags)

AMake AJAX cacheable

AUse GET for AJAX requests

AReduce the number of DOM elements

AAvoid HTTP 404 (Not Found) error

AReduce cookie size

FUse cookie-free domains

AAvoid AlphaImageLoader filter

ADo not scale images in HTML

Grade F on Make fewer HTTP requests

This page has 5 external Javascript scripts. Try combining them into one.
This page has 7 external stylesheets. Try combining them into one.
This page has 25 external background images. Try combining them with CSS sprites.

Decreasing the number of components on a page reduces the number of HTTP requests required to render the page, resulting in faster page loads. Some ways to reduce the number of components include: combine files, combine multiple scripts into one script, combine multiple CSS files into one style sheet, and use CSS Sprites and image maps.
